

Commercial Pilot with Applied Human Factors Aviation Diploma

Overview

An enhanced level of pilot decision-making and situational awareness relevant to entry level pilots into the aviation industry and instruction of trainee pilots.

The successful traits and skills required to pass the usual advanced pilot selection processes in aviation today, which are often based on a psychological examination or assessment procedure.

Methodological analysis, problem solving and evaluation, which are useful in dealing with abnormal and emergency scenarios that may be encountered in the aviation industry.

Obtain a Transport Canada Commercial Pilot licence, endorsed with an enhanced knowledge of human factors and mountain flying abilities.
