

Advanced Aviation Diploma

Overview

The Advanced Aviation Diploma Program of Langley Flying School (LFS) prepares leaders in the aviation industry with both flying skills and strong understanding of the aviation business.

In addition to the basic flight training, academic courses are separate but complementary components that provide aviation related knowledge concurrent with flight training.

This program includes an expanded look into the details of aviation safety, aviation services, leadership, aviation crisis management, aviation company management, and marketing in the aviation business, further enhancing students’ essential background knowledge for a career in aviation.
